Electrical Energy Training Course

An Understanding of how Electricity Fatally Damages People

Course duration: 2.5 hour short course

Course outcomes:

Participants will;

- Understand the basics of how electricity works, including voltage, resistance & current.
- Understand what levels of current damage and why.
- Understand the difference between isolators, circuit breakers and safety switches.
- Understand the role of 'Tag and Test' in electrical safety.
- Know what to do in the event of an emergency.
- Understand the pattern of electrocutions for community and work situations.
- Identify exposures within their current work and home situation that have the potential to produce electrocution.
- Identify control measures to reduce the likelihood of damage from electricity into the future.

**The Electrical Energy Course sets a Clear Focus for
Managing Electricity!!**

*Other short courses available in:
Gravitational Energy, Human Energy and Vehicular Energy.*
