

Ergonomic Assessment

Ergonomics involves preventing undesirable interactions of people, equipment and the environment. The application of the science of ergonomics can <u>increase efficiency and productivity</u>, as well as levels of health and safety.

You Can Benefit From Our Experience

InterSafe has many years of experience in undertaking all sorts of ergonomic assessments – for workplaces, tasks, designs etc. InterSafe Ergonomists can assess your manual handling tasks, work station layout and design and any potential for overuse injury, and occupational health and stress. InterSafe will ensure that all State Statutory obligations and Federal guidelines are fulfilled.

You Can Benefit From Our Resources

InterSafe has the necessary equipment and software resources to undertake detailed measurement analysis of exposure parameters such as noise, slip resistance, vibration, and biomechanical loadings.

You Can Benefit From Our Training

InterSafe also provides extensive training in the areas of Ergonomics. This training will further equip you and your employees to understand and apply basic ergonomic principles in your work environment. We are able to tailor-make our training to suit your specific needs.
